SUMMARY

Product and business leader with 8+ years of experience building AI-powered, marketplace, fintech and healthcare products from 0 to 1 and scaling them across startups and enterprises. Led cross-functional teams across product, operations, engineering and GTM, delivering measurable improvements in revenue, retention, automation and customer experience

EXPERIENCE

Co-Founder and Product Head at SYLO

July 2025 – Present

Built and scaled a hyperlocal marketplace, owning product, growth, and customer experience.

Bengaluru

- Built a 0 to 1 hyperlocal marketplace across 15 gated communities, achieving INR 50 lakh ARR with 150 users.
- Owned the roadmap and launched Parent, Trainer, and operations app for bookings, attendance, and payments.
- Optimized onboarding and booking journeys to improve activation, retention, and repeat usage.
- Leveraged product analytics and customer feedback to prioritize roadmap decisions.

Senior Product Manager at Frontier Business Systems

Aug 2024 – June 2025

Owned enterprise product delivery, translating customer problems into scalable solutions.

Bengaluru

- Defined product requirements and prioritized based on customer feedback, increasing adoption by 20 percent
- Built self-service analytics dashboards, reducing reporting time by 60 percent and improving decision making.
- Automated enterprise workflows, reducing manual effort by 30 percent and improving process reliability.
- Partnered with engineering and business teams to launch scalable AI products for enterprise customers.

Senior Product Manager at Kenko Health

Nov 2021 – July 2024

Led product initiatives across claims to improve customer experience and business growth.

Bengaluru

- Built SHOHO, a healthcare marketplace, increasing retention by 9 percent and generating 500K USD revenue.
- Launched TruCashless, simplifying claims and hospitalization workflows across 100+ hospital partners.
- Defined end-to-end claims workflows, achieving 95 percent STP and reducing turnaround time by 40 percent.
- Executed product experiments to improve onboarding and conversion, increasing performance by 15 percent
- Led 13+ partner API integrations, expanding provider network coverage and improving customer access
